

Quotation

Title: Fail to Safe version 2

Project Overview

This document serves as a quotation for the development of the "Fail to Safe" system, which includes various modules to manage users and monitor network connections effectively.

Modules Included:

1. **Dashboard**
 - Displays detailed information and data related to the system.
2. **User Management**
 - Allows adding, editing, and deleting user accounts.
3. **Connected Users**
 - Shows all connected users to the system in real-time.
4. **General Settings**
 - Provides editable details of the router settings for better management.
5. **Dual ISP**
 - NEED TP-LINK ER605 OMADA.

Pricing:

- **Total Cost:** PHP 15,000.00
- **NEEDED EQUIPMENT:** PHP 2,697 (TP-LINK)

Design & Aesthetic

This quotation will be delivered in a visually appealing PDF format, incorporating a clean, professional layout with structured sections, modern typography, and subtle design elements to enhance readability.

Terms & Conditions

- The quoted price includes development, basic testing, and initial deployment.
- Any additional features or modifications beyond the scope of this document may incur additional charges.
- Payment terms: 50% upfront, 50% upon project completion.
